

<b>Bulletin Number:</b> NJ_IB_0020	<b>Distribution Date:</b> 07/09/24	<b>Effective Date:</b> 07/15/2024
<b>Contact Point:</b> Metrc® Support	<b>Subject:</b> Addition of Lab Test Types	
<b>Reason:</b> Metrc is providing some updates on additional Lab Test Types		

Greetings,

Metrc, in conjunction with the CRC, would like to provide information about updates regarding new Lab Test Types that will be available on July 15, 2024. This bulletin will show information regarding those new Lab Test Types.

Please find the details on the following pages:

## **Lab Test Batches**

The new Lab Test Types are listed below and will be implemented on July 15, 2024, in Metrc with the approval of the CRC:

**Total Terpenes** (Available to be added to a Lab Test Batches even though it is not required)

**Terpinolene** (Available in a Lab Test Batches even though it is not required)

Even if the specific test type is not required for a Lab Test Batch, the individual Lab Test Types are still available in Metrc to be entered by a Testing Facility.
